

THERE IS STILL TIME TO APPLY TO PRESENT IN SALT LAKE CITY, UT ON FEBRUARY 21-23, 2008.
APPLICATION DEADLINE IS JUNE 15, 2007.

Go to www.iteaconnect.org/Conference/apptopresent.htm for the easy online application.

Theme: Teaching “TIDE” with Pride!

Technology, Innovation, Design, Engineering - four simple words forming the acronym TIDE.

TIDE indicates that technology education is not just about computers. The concepts and principles underlying TIDE, while not designed as preparation for any one specific career or area of future study, articulate the content and strategies included in the study of technology and engineering. These concepts and principles provide a base for the pursuit of a wide range of future endeavors that utilize the TIDE knowledge, skills and attitudes.

Conference Theme Strands:

When developing presentation proposals for the 2008 ITEA Conference, applicants should focus on the TIDE concept as they address one of the following conference theme strand areas:

Strand 1: Developing Professionals

Strand 2: Realizing Excellence

Strand 3: Planning Learning

Strand 4: Measuring Progress
