

# DELIVERING THE T & E IN STEM

Planning to attend ITEA's 71st Annual Conference in Louisville? If so consider presenting at the Teaching Technology Showcase (aka Tech Fest). The Teaching Technology Showcase is an interactive session where you share and describe ideas with others. This is an exhibition of best practices in the teaching of technology education. Showcasers include, but are not limited to, K-12 technology teachers, teacher educators, administrators, undergraduate and graduate students, and informal educators.

The Showcase provides a forum for those concerned with advancing technological literacy to feature an idea, technique, or best practice related to learning activities, marketing materials, career guidance, facility design, program design, assessment methods, equity, or classroom and laboratory management techniques, among other unique practices. ***Plan now to be a part of the Teaching Technology Showcase in Louisville, Kentucky by completing the online application at <http://www.iteaconnect.org/Conference/TeachTechShowcaseForm.pdf> before March 13, 2009.***

We are seeking lessons, projects, and activities for Elementary through High School and University level as well. If you have something please share it with us. If you know someone who is doing something interesting please let us know so we may contact them.

This is a great chance to gain some valuable recognition for your program and the hard work you do. So, don't miss this extraordinary opportunity to collaborate with your peers and celebrate the future of our profession. ***See you in Louisville!***
